Kodiganti Sudharshan

Email ID: sudharshankodiganti4h8@gmail.com

Phone: +91 8886413186

SUMMARY:

- Total of **5 years** of experience in IT industry
- Experienced Java Application support with **3 years of experience in maintaining Java applications, particularly in Prognostic Health Monitoring (PHM) and ADD Knowledge management applications**. Proven ability in Java Development with **2** years of experience in Nokia(FlowOne) providing design and development for Network elements
- Experienced in working with iterative **Agile Programming Methodologies, SCRUM**
- Proficient in **Java, JDBC** and other essential languages for application development and a good exposure with java 1.8
- Developed web applications using **Spring MVC, Spring Boot,** and **Spring Rest frameworks** for different project requirements.
- Proficient in working with databases like **MySQL**
- Skilled in developing **RESTful APIs** for seamless integration and communication between systems.
- Experienced in writing efficient SQL queries, stored procedures, and database management using **PL/SQL.**
- Experienced in version control systems like **GIT** for source code management and collaboration.
- Managed version control using **GIT** and project management using JIRA, Microsoft Teams, and Confluence.
- Facilitated communication between technology teams and other departments on issue status and resolution.
- Experience in production support, ITSM, Service Request, Incident, Remedy.

TECHNICAL SKILLS:

Languages	Java, JDBC, PL/SQL
Web Services/Servers	RESTful APIs
Architecture Pattern	MVC, Microservices.
Frameworks	Spring MVC, Spring Boot, Spring REST, Spring Data JPA
Databases	MySQL
Containerization	Docker, Kubernetes.
Cloud Technologies	AWS.
Build and Deployment Tools	Maven.
Source Controls and Configurations	GIT.
Project Management tool	Jira
Security Frameworks	Spring Security

CERTIFICATIONS:

AWS Certified Solution Architect Associate

Education qualification:

Degree	Institution	Year Completed	Field of Study
SSC	Good Shepherd English Medium school	2013	General Education
Intermediate	Narayana Junior College	2015	MPC
B. TECH	Rajeev Gandhi Memorial College of Engineering & Technology	2019	Electronics and Communication Engineering

PROFESSIONAL EXPERIENCE:

Client: Cognizant/Abott Laboratories   **Feb 2023 to Present**

Role: Software Engineer

Responsibilities:

- Providing support for SP3 applications Prognostic Health Monitoring and Knowledge management

- During DB migration, worked on connection changes for Knowledge management application and done application checkout end to end
- Monitoring the PHM jobs and ensuring that jobs are running as expected
- Worked on SSL certificate upgrade for Apollo PHM application
- Addressed and resolved customer issues by efficiently handling ServiceNow tickets, ensuring prompt and accurate solutions to enhance customer satisfaction
- Represented the domain in Weekly decks.

Client: Cognizant/Abott Laboratories   **Nov 2021 to Jan 2023**
Role: Jr Software Engineer

Responsibilities:
- Worked for an Independent and re-usable/ generic Web-based application for the Medical Representatives who works as a customer representative for the Medicare Industries
- We will interact with third party teams to exchange Data, Interaction. And been a offshore "Point of contact" for five applications.
- Performed year end activities for Kana application
- Investigated requests for maintenance, server checkouts and repairs for swift resolution.
- Represented the domain in Bi-Weekly decks.
- Provided the extended support when required.
- Worked end to end on Maestro and Kana application upgrade. And received the appreciation for working as one from offshore.
- Worked as POC of digital domain for Minor Enhancements with timely deliverables.
- Provided the immediate resolution on timely manner by extending the working hours during P1/P2 issues, with no impact and escalation.

Company: Tata Consultancy Services   **Sep 2019 to Nov 2021**
Role: Systems Engineer

Responsibilities:

- Involved in NEI interface design and development
- Implementation and development of JAVA Coding for Rest APIs - Network Element Interface – SDK framework to configure a Network Element in the Network Management System
- Created and maintained RESTful APIs with Spring Boot to ensure efficient communication between client and server.
- Implemented data access layers using Spring Data JPA
- Including implementation for new components in existing code, analysing and understanding the bug through logs and fixing the issue
- Identifying areas for modification in existing code and subsequently developing the modifications
- Resolved the priority issues through investigation of debug logs and based on the issue scope
- Collaborated with cross-functional teams to design and implement application architecture and project requirements
